

Everything
you wanted
to know about mosquitoes

Dare to ask!

Thursday 16th of January 2020,
18:00, Amphitheatre 1
Tasos Papadopoulos Building
Cyprus University of Technology,
Limassol

Everything you wanted to know about mosquitoes. Dare to ask!

Why do mosquitoes bite me? Why mosquitoes at home are huge? What do the ‘infected’ mosquitoes carry? Which are the tiger mosquitoes? are we in danger from them? How can I get rid of mosquitoes? Can I help as a citizen?

Come and find out more about your lovely companion that buzzes in your ear, gives you love bites and comes back even though you turn it away! Ask renowned international experts what you can do to make this relationship a little bit less miserable.

The event is funded within the framework of COST Action CA17108 «*Aedes Invasive Mosquitoes*» and it is co-organised by the Joint Services Health Unit, the Cyprus Institute, Enalia Physis and the Cyprus University of Technology.

The discussion will be moderated by Dr Angeliki F. Martinou, Joint Services Health Unit and Dr Marlen Vasquez, Cyprus University of Technology
